

CONTENTS OF VOLUME 273

NUMBER 1, SEPTEMBER 1, 2002

Spatial and continuous dependence estimates in linear viscoelasticity	1
J.I. Diaz and R. Quintanilla	
Absolutely continuous functions and differentiability in \mathbb{R}^n	17
D. Bongiorno	
Stability of linear descriptor systems with delay: a Lyapunov-based approach	24
E. Fridman	
Spectral analysis and multidimensional stability of traveling waves for nonlocal Allen–Cahn equation	45
P.W. Bates and F. Chen	
Characterizations of evenly convex sets and evenly quasiconvex functions	58
A. Daniilidis and J.-E. Martinez-Legaz	
Perturbations of hypercyclic vectors	67
N.S. Feldman	
Energy bounds for some nonstandard problems in partial differential equations	75
L.E. Payne and P.W. Schaefer	
Nonatomic total rewards Markov decision processes with multiple criteria	93
E.A. Feinberg and A.B. Piunovskiy	
A generalization of the Banach Contraction Principle	112
J. Merryfield and J.D. Stein	
Existence and numerical approximations of periodic solutions of semilinear fourth-order differential equations	121
J. Chaparova	
Nonlinear eigenvalue Neumann problems with discontinuities	137
F. Papalini	
Convergences of nonexpansive iteration processes in Banach spaces	153
J.S. Jung	
Extensions of Hardy inequality	160
C.-P. Chen, D.-C. Luor, and Z.-y. Ou	
A oscillation theorem for a class of even order neutral differential equations	172
S. Tanaka	

Optimality and duality for the multiobjective fractional programming with the generalized (F, ρ) convexity	190
X. Chen	

Estimate of the solution of the Dirichlet problem for parabolic equations and applications	206
A.S. Tersenov	

Singularly perturbed partly dissipative reaction–diffusion systems in case of exchange of stabilities	217
V.F. Butuzov, N.N. Nefedov, and K.R. Schneider	

Notes

Some formulae for the q-Bernoulli and Euler polynomials of higher order	236
T. Kim	

A note on blow up of solutions of a quasilinear heat equation with vanishing initial energy	243
S.A. Messaoudi	

NUMBER 2, SEPTEMBER 15, 2002

Hölder ratio of solutions of elliptic equations with a point on the boundary	249
C. Giannotti	

Geometry of 2-homogeneous polynomials on ℓ_p spaces, $1 < p < \infty$	262
B.C. Grecu	

On characterizations of unique extremality	283
H. Zhu and J. Chen	

On the system of two difference equations $x_{n+1} = \sum_{i=0}^k A_i / y_{n-i}^{p_i}$, $y_{n+1} = \sum_{i=0}^k B_i / x_{n-i}^{q_i}$	294
G. Papaschinopoulos and C.J. Schinas	

Approximate controllability of semilinear functional equations in Hilbert spaces	310
J.P. Dauer and N.I. Mahmudov	

A tangential interpolation problem on the distinguished boundary of the polydisk for the Schur–Agler class	328
J.A. Ball and V. Bolotnikov	

An annulus for the zeros of polynomials	349
J.L. Díaz-Barrero	

Long time behavior of Riemannian mean curvature flow of graphs	353
G. Citti and M. Manfredini	

A note on the existence and boundedness of singular integrals S. Yongzhong and Z. Zhifei	370
On ordinary difference equations with variable coefficients F.G. Boese	378
On the solution of a coupled thermo-mechanical problem for non-homogeneous Timoshenko-type shells V.A. Kryś'ko, J. Awrejcewicz, and V.M. Bruk	409
Finite Blaschke product interpolation on the closed unit disc C. Glader and M. Lindström	417
Robin-type boundary control problems for the nonlinear Boussinesq type equations A. Belmiloudi	428
Dynamics for controlled 2-D Boussinesq systems with distributed controls H.-C. Lee and B.C. Shin	457
Positive solutions for singular semi-positone boundary value problems X. Xian	480
Persistence and global stability for discrete models of nonautonomous Lotka–Volterra type Y. Muroya	492
Application of implicit function theorems to existence of solutions to ordinary differential equations with nonlocal boundary conditions L.E. Bobisud, T.S. Do, and Y.S. Lee	512
A learning rule with generalized Hebbian synapses F. Botelho and J.E. Jamison	529
Linear perturbations of a nonoscillatory second order difference equation II W.F. Trench	548
Quadratic forms in skew normal variates A.K. Gupta and W.-J. Huang	558
Existence and multiplicity results for classes of elliptic resonant problems J. Su	565
Delay-dependent stability criterion for neutral time-delay systems via linear matrix inequality approach K.-K. Fan, J.-D. Chen, C.-H. Lien, and J.-G. Hsieh	580
Harmonic analysis of signed Ruelle transfer operators D.E. Dutkay	590

Estimation of the solutions of Volterra difference equations	618
V.B. Kolmanovskii and J.-P. Richard	
Anti-periodic solutions for semilinear evolution equations	627
Y. Chen, X. Wang, and H. Xu	
A boundary value problem for nonlinear hyperbolic equations with order degeneration	637
R. Semerdjieva	
A generalization of the Lane–Emden equation	654
D.C. Biles, M.P. Robinson, and J.S. Spraker	
$A_r^\lambda(\Omega)$-weighted imbedding inequalities for A-harmonic tensors	667
B. Liu	
<i>Author index for volume 273</i>	677
